Age Group and Heart Disease character variables were successfully created

- < 40 = Young; 40-60 = Middle-Aged; > 60 = Senior
- target (0) = No; target (1) = Yes

Labels were added to make variables more interpretable.

# 2. Check for missing values in the new variables using missin option in te frequency procedure :

### The FREQ Procedure

Age_Group	Frequency	Percent	Cumulative Frequency	Cumulative Percent
Middle-Aged	696	67.90	696	67.90
Senior	272	26.54	968	94.44
